

A BRIEF BIBLIOGRAPHY OF WORKS WHICH EMPHASIZE EVIDENCE  
FOR THE ACCEPTABILITY OF AN OLD-EARTH CREATIONIST VIEW \*

(Unless specifically stated otherwise, this bibliography includes only those works which endorse, recommend, or explain special creation, rather than theistic evolution.)

by D. E. Wonderly, 1987

- (Both Dawson and Dana were well-known geologists)*
1. Buswell, James O., Jr., A Systematic Theology of the Christian Religion. Zondervan, 1962.  
Pages 134-162 of Volume I deal with the creative days. An earlier version of this work of Buswell's is reprinted as an appendix in Pattle P. T. Pun, 1982 (See Pun, below).
  2. Cain, Dallas E., Creation and Capron's Explanatory Interpretation: A Literature Search. Interdisciplinary Biblical Research Institute, P. O. Box 423, Hatfield, PA 19440, 1986, Research Report no. 27, 24 p., \$2.00.
  3. Custance, A. C., Without Form and Void. Brockville, Ontario: Doorway Publications, 1970, 211 p. (out-of-print)  
A scholarly defense of an early original creation, from the Hebrew text.
  4. Dana, James D., "Creation: Or, the Biblical Cosmogony in the Light of Modern Science." Bibliotheca Sacra, v. 42 (1880), p. 201-224.  
According to John D. Hannah, in an article in Grace Journal, v. 4, no. 1, 1983, Dana, in later life--especially after 1880--accepted a considerable number of the tenets of Darwinism. But, during most of his life he was a strong defender of special creation, e. g., in several short articles in Bibliotheca Sacra, v. 13 (1856), and v. 14 (1857). He championed the day-age view of creation.
  5. Dawson, J. W. ("Sir Wm"), "Points of Contact Between Science and Revelation." Princeton Review, v. 4, 1879, p. 579-606.
  6. Dawson, J. W. ("Sir Wm"), The Origin of the World According to Revelation and Science. London: Hodder and Stoughton, 7th edition, 1898. (An earlier edition was published by Harper Bros in New York in 1877.)
  7. Gange, Robert A., Origins and Destiny. Word Books, 1986.  
Gange is a physicist, and Director of The Genesis Foundation, of Princeton, N. J.
  7. Guyot, Arnold, Creation. New York: Scribner, 1884.  
Guyot was Professor of Geology at Princeton University. He defended old-earth creation doctrine both from geological evidences and from the Hebrew text.
  9. Hayward, Alan, Creation and Evolution: the Facts and Fallacies. Triangle/SPEK, available in U. S. from Fortress Press, 1985, 232 p. \$4.95.  
A carefully written work, representing good scholarship--though written in semi-popular style. This work is especially useful because it gives extensive and good-quality evidences against both macroevolution and young-earth creationism. The publisher, unfortunately, greatly cheapened the format of the book, and omitted the photographic plates to save expense.

\* See attached list of a few sedimentary geology books which creationists should be using in a study of non-radiometric evidences for great age.
