BACKGROUND OF THE AUTHOR

Daniel E. Wonderly

A lifelong commitment to the full inspiration of the Bible and the need to make known the compatibility of that Book with the data which are obtained during scientific research.

Undergraduate Degree:

Wheaton College--anthropology (1949)

Graduate Degrees:

Central Baptist Seminary of Kansas

City--O. T., N. T., and theology (1952 and 1955)

Ohio University--biological science (1961)

Teaching Experience:

Southeastern Bible College--3 years (Bible, anthropology, etc.)

Wingate College--5 years (science)

Grace College, Winona Lake, Indiana--7 years (science)

Additional Formal Studies during the years of teaching:

National Science Foundation Institutes--(biology and paleontology)

Indiana University--(geological science)

Bermuda Biological Station--(sedimentary geology)

Further Studies:

During the past 14 years the author has regularly spent large amounts of time in private study of published reports of sedimentary research projects carried out in the 1960's, 70's, and 80's, and has done a considerable amount of reading in published works of creationist Bible scholars. Concurrent with these studies have been the regular attendance of professional geological meetings and participation in geologic field trips which were organized and led by officers and staff members of the American Association of Petroleum Geologists, the Geological Society of America, the Field Conference of Pennsylvania Geologists, and other earth-science organizations.

The author is a member of the Geological Society of America (Sedimentary Geology Division) and maintains personal contact with several other members of that organization who are in teaching and research. During the past 10 years the author has completed the two books listed in "References Cited," above, under "Wonderly," and has done much consulting in the fields of Bible-science relationships and science education.
